Ryan, Bob,

The subject addendum is approved with comments:

Station U2C-2, stated as a reference envelope station in Attachment 1, was not a station included in the Portland Harbor reference envelope definition, as can be seen in Table RE-1 of the Portland Harbor reference envelope definitions in the BERA. Station U2C-2 needs to be removed as a reference envelope station from all future data evaluations.

Please coordinate with EPA on actual start date/times for the sampling next week.

Thank you.

S

Subject: Gasco AIR Data Gaps Sampling Addendum - Midge Retesting

## Sean -

As discussed during our April 8, 2011 meeting, attached please find our proposed scope of work addendum for completing retesting of surface sediments from the Gasco Sediment Site Project Area for chemical analysis and midge toxicity testing. All sampling and analysis activities would be conducted in accordance with the previously EPA-approved Final Project Area Identification Report dated July 2010.

We are currently scheduled to complete the data collection activities during the week of April 18th so please let us know if the scope of work amendment is approved and work can proceed. As always, please let me know if you have any questions. Regards.
